Stylish charm

With its 'boomerang' front headlamps, its chevrons built into the chrome grille and its precisely designed shape giving optimum aerodynamics, it is hard to resist the unique charms of the Citroën C4, whether it's a Saloon or a Coupé.

If you are a lover of beautiful cars, the shape of Citroën C4 will catch your eye. Just look at the harmonious flowing curves of the Saloon which extend the roof line to the rear tail gate and the striking rear lights which accentuate the aerodynamic shape of the body.

The Coupé favours a sharper line with acute angles giving it a unique identity while maintaining smooth, fluid lines for outstanding aerodynamics. Compact and low to the ground, Citroën C4 has a real aura of vigour and sportiness.

Performance

Citroën C4 is available with a choice of 3 petrol engines:

- The 80kW 1.6i petrol engine for an optimum power/fuel consumption ratio, both in town and on the open road. Available in 5 speed manual and 4 speed automatic.
- The new VVT 103kW 2.0i petrol engine is characterised by remarkable power, spirited acceleration, and excellent fuel efficiency. Available with both 5 speed manual and 4 speed automatic transmissions.
- The powerful 130kW 2.0i VTS petrol engine offers exceptional vitality for a sportier drive with 5 speed manual transmission.

Citroën C4 is also available with an 80kW 1.6i turbo diesel engine that provides an optimum power/fuel consumption ratio, both in town and on the open road. Torque can be increased to 260Nm at 1,750rpm on the three highest gears, thanks to the overboost function. For strong bursts of acceleration, the "overboost" function kicks in, delivering up to 20Nm of additional torque by increasing the fuel injection rate. This new engine therefore combines a fast response with a linear increase in power, and excellent acceleration at low engine speeds.

Intelligent and unique

The on-board trip computer is standard on all models. It constantly keeps track of all the driver-useful information (range, distance travelled, fuel consumption, average and current speed...) and if necessary displays warning messages.

All the different warnings are clearly shown on the central multifunction display screen and accompanied by a specific sound alarm.

The speed limiter allows you to set a maximum speed whenever you wish. A firm 'kick-down' on the accelerator is all that's needed to cancel this function temporarily and allow you to accelerate. As soon as the speed of the car falls back below the speed originally set, the limiter cuts back in again automatically.

Cruise control allows you to maintain a desired speed without using the accelerator. However, the speed can be increased or decreased, and cancelled or reinstated at any time by using either the pedals or the fixed centred controls on the steering wheel.

Citroën C4's stereo Radio/CD player has an off-set display so that it is visible from every seat. A full range of controls is built into the steering wheel. On the move, the volume of the RDS stereo Radio/CD player adjusts itself automatically as a function of the car's speed to maintain ideal listening conditions.

The optional JBL Hi-fi system* gives listeners a made-to-measure sound performance with an innovative 7 speaker lay-out especially for the Citroën C4. The sub-woofer* fitted in the boot gives an exceptional depth and quality of sound.

*Optional, by factory order.

A Citroën innovation: The controls and lights built into the centre of the steering wheel never move, however much it is turned. The fixed centred controls allow access to all the different functions without your hands leaving the steering wheel or your eyes leaving the road.

Exceptional driving comfort

The Citroën C4 has been designed to offer the very best driving experience in all situations – on the open road and in town, at high speed and when manoeuvring, whether it's raining, windy or snowing...

Air conditioning is standard on all C4 models. The 1.6L models feature air conditioning with a pollen filter and electric air re-circulation controls. The 2.0L VTS and Exclusive models include dual-zone adjustment, which means the front passengers can have their own temperature settings. This system includes a pollen and pollutant gas filter and the electric air re-circulation is activated by a push button on the steering wheel. A heat reflecting windscreen is standard on the 2.0L VTS and Exclusive models reducing the time the external temperature takes to heat the cabin.

A button on the left of the steering wheel allows you to control the courtesy light and the 'Black Panel' function, useful for night-time driving.

*Optional, by factory order.

The ergonomics of the equipment, such as the centred translucent instrument display, and the intelligence of the driving-assistance functions, such as the variable power-assisted steering, give you a serene, comfortable drive.

Thanks to its voice-recognition technology the 'BlueTooth'* system allows you to use your own mobile telephone very easily and very safely (as long as it is Bluetooth-compatible), because the car takes over the functions of the telephone.

The lit glovebox is cooled via vents from air-conditioning – a convenient feature particularly in warmer weather.

The instrument cluster displays information by way of a translucent strip located in the centre of the dashboard, capturing the light perfectly. As the display contrast adjusts instantly to the light, legibility is perfect in all circumstances by day and night, in full sunlight or in darkness.

Above the driver's seat a storage area for your glasses allows you to keep them safe and within reach*.

The high frequency remote control key not only locks and unlocks the doors and boot, it controls the "guide me" function which provides temporary illumination of the headlights. It can be used to close the windows when the car is already locked, activate the hazard lights to locate the vehicle and (if fitted) the key memorises the electric setting for the driver's seat and rearview mirrors.

Smart and effective, the 'flag-type' door mirrors include aspherical glass to reduce the blind spot. Electrically adjustable on all models.

The C4 Coupé features a retractable anti-return clip that is built into the side of the front seats to restrain the seatbelt which makes it easier to reach.

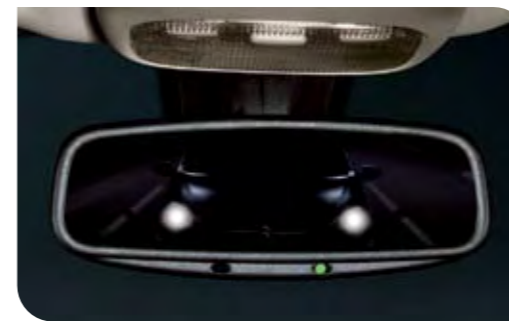

To help prevent any risk of an impact, the rear electronic parking sensors[^] have both an audible and visual directional alert feature. They are standard on the 2.0L VTS Coupé.

The Citroën C4's rear wiper activates automatically when the reverse gear is engaged and the front wipers are on.

*Only on 2.0L models.
[^]Optional, by factory order on 5 door models.

Thanks to specially designed light sensors the Citroën C4's electrochromic rear-view mirror[>] darkens automatically to reduce the risk of dazzling from the headlights of cars behind.

The Citroën C4 goes even further in terms of comfort with the availability of a scented air freshener dispenser, styled to match the dashboard design. This scented air freshener contributes perfectly to the relaxed on-board atmosphere. Scented cartridges are available as an accessory, with a choice of nine subtle scents ranging from Vanilla to Ylang and Bamboo.

[>]Standard on VTS and 2.0L Exclusive.

Safety in action

The wide range of safety features on the Citroën C4 will impress you right from the start. These advanced safety features coupled with the exemplary roadholding inherent in Citroën suspension technology, guarantees the best possible control of the car in all driving conditions.

The advanced Xenon dual function directional headlamps⁺, which work on both dipped and full beam, give a wide field of vision and follow the turn of the steering wheel. This increases visibility in the potentially dangerous dark areas on bends.

Automatic illumination of headlamps* as soon as the light fades.

Automatic rain-sensitive windscreen wipers on all models adapt the wiping speed to the intensity of the rain.

The Citroën C4 VTS tyre pressure monitor system regularly checks the pressure of each tyre and warns the driver of any problem both visually and by sound – a very important safety feature.

On rapid deceleration, the hazard warning lights come on automatically to warn drivers behind. They go off when accelerating, or they can be switched off manually.

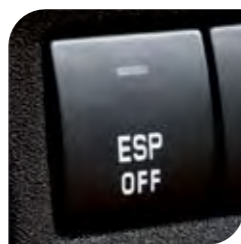

⁺Optional on 2.0L VTS, 2.0L VTR and 2.0L Exclusive models.
*Standard on 2.0L models. Optional on 1.6L models.

Safety for all

Because roads will never be 100% safe, the Citroën C4 provides many safety features as standard to guarantee maximum safety for its occupants. The bodyshell is designed with reinforced structures and energy absorbing zones

to act as a protective cocoon against front and side impacts. The passenger cell has a whole host of specific features which restrain and protect all the passengers, whether adults or children, both in the front and the rear.

Active safety

The new Citroën C4 has achieved a 5 star rating in the tough EuroNCAP independent crash tests, including a 100% pedestrian safety rating. To reduce the consequences of possible pedestrian impact the subframe is equipped with two impact absorbers to limit knee injury while a non-aggressive front, including lowered headlamps and an aluminium bonnet, absorbs energy more effectively.

The Citroën C4's braking system combines ABS with Electronic Brakeforce Distribution (EBD) and Emergency Braking Assistance (EBA). Research shows that many drivers fail to brake with full force in an emergency. Emergency Braking Assistance (EBA) compensates for this by automatically maximising application of the brakes when strong braking is initially detected.

Additional reassurance comes from the Electronic Stability Programme (ESP)* which monitors the car's progress through a bend. If oversteer or understeer is detected, ESP automatically modifies the engine's torque and applies the brakes to maintain stability and control. ASR Traction Control* is standard with ESP and assists to reduce wheel spin for better traction.

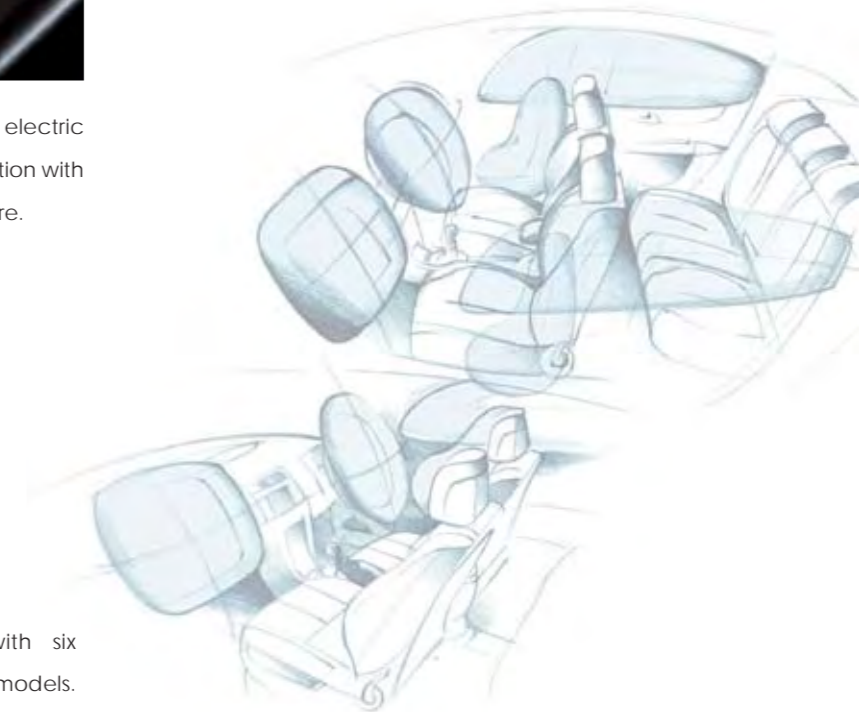

Each of the front and rear electric windows has 'one-touch' operation with a built-in anti pinch safety feature.

Citroën C4's five seats all have 3-point inertia reel seat-belts. There is a seatbelt 'unfastened' warning light for each one. The front seat belts have pyrotechnic pretensioners and force limiters. The rear outside seatbelts are equipped with force limiters.

In the event of a strong frontal impact pretensioners tighten the seatbelts instantly, while force limiters limit the tension of the shoulder belts.

The Citroën C4 is fitted with six airbags as standard on all models. The front airbags are adaptive, ie. the power and speed of inflation of each airbag is controlled according to the severity of the impact. Moreover, thanks to the fixed centred controls steering wheel, the driver's airbag always deploys at the right angle.

Lateral airbags are built into the front seats and are activated in the event of a side impact so as to move the

occupant towards the middle of the passenger cell – away from the maximum impact zone – and thus reduce the effect of the impact.

The side window airbags built into the roof are activated in the event of a side impact to protect the heads of front and rear passengers.

*Standard on 1.6L HDI and 2.0L Petrol models. Factory order option on 1.6L Petrol models.

Life on-board

Elegant, seductive, and perhaps above all, practical and pleasant to be in, Citroën C4 offers the very best in travelling comfort. The remarkable amount of legroom for rear passengers being a particular feature, even when the front

seats are pushed back as far as they will go. There are a huge number of storage spaces throughout the car and a large boot with split folding rear seats makes the C4 highly practical as well as stylish.

The front armrest slides out and is retractable. It is the location for the 5 stack CD player*.

A drawer under the front passenger seat is practical and discreet – it can be used to keep items readily accessible in a place where they cannot be seen. Both of the front interior door panels feature two storage areas.

Storage 'push/pull' drawers at both ends of the dashboard can be used to store money or credit cards.

Light and sunshine are welcomed on board through an optional panoramic full glass sunroof with retractable screens, increasing the sense of vitality for the driver and passengers and giving the vehicle an atmosphere of its own.

Seating and space

The rear seat of the Citroën C4 can be folded 2/3 - 1/3 – both seat cushion and backrest. Each part of the backrest and the cushion can be folded down to free up extra space. Modularity goes even further: the rear seat base can be removed so that the boot can be loaded right up to the front seat.

The seating in the C4 has been designed for maximum comfort and minimum fatigue. The C4 Coupé features "sports" front seating while the C4 Saloon features "comfort" front seats. The driver and passenger seat headrests are height adjustable on the 1.6L models and height and tilt adjustable on the 2.0L models. The steering wheel is height and tilt adjustable for optimum driver comfort. The optional leather electric driver's seat* on the C4 2.0L Saloon includes a two position seat memory and heating controls for both front seats. The optional leather pack on the VTS also features heated front seats.

*Standard on 2.0L models, optional by factory order or as an accessory on 1.6L.

*Available as optional on 2.0L VTR manual and 2.0L Exclusive auto with premium leather pack.

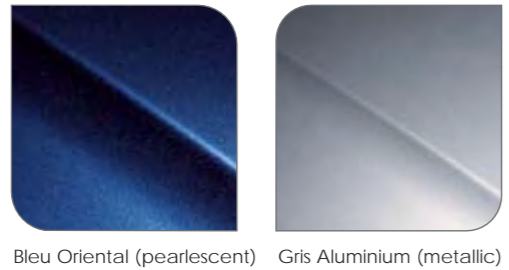

Colours galore

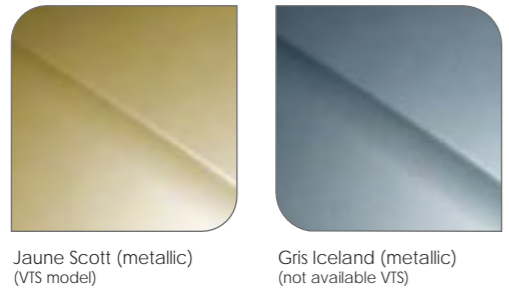

Blanc Banquise Noir Obsidien (pearlescent)

Gris Fer (pearlescent) Rouge Lucifer (pearlescent)

Bleu Oriental (pearlescent) Gris Aluminium (metallic)

Jaune Scott (metallic) (VTS model) Gris Iceland (metallic) (not available VTS)

Sable de Langrune (pearlescent) (Saloon models)

The low profile look of the Citroën C4 is complemented by 16" steel wheels or optional 16" alloy wheels for the 1.6L models, and impressive 17" alloy wheels for the 2.0L VTR, 2.0L Exclusive and 2.0L VTS models.

16" 'Radical' alloy wheels (Optional: VTR, SX, Exclusive)

17" 'Resolfen' alloy wheels (2.0L VTR and VTS models)

17" 'Toka-Toka' alloy wheels (Exclusive model)

Interior seat trims

'Comfort' seats - Saloon 'Sport' seats - Coupé

VTS Premium Leather Pack: includes leather seats, door panels, gearshift cover and steering wheel, heated front seats.
2.0L Exclusive Premium Leather Pack: includes leather seats, door panels, gearshift cover and steering wheel, heated front seats and 2 plip keys. Plus 8 way electronically controlled drivers seat with lumbar adjustment, 2 position memory and dipping side mirrors when reversing.

Two Leather Choices:

'Mistral' leather* 'Wadibis' leather*

Black 'Mesh 3D X-Ray' Cloth/Grey Alcantara®/Leather (standard on VTS)

Grey 'Tryweb' Cloth (Standard on 1.6L models)

Black or Beige 'Soundtrack' Velour (Standard on 2.0L Exclusive)

*Optional by factory order
